DETAILED ACTION

Acknowledgements

1. Applicants' amendment filed on June 4, 2010 is acknowledged. Accordingly, claims 1, 3-11, 13-20, 34 and 35 remain pending and have been allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:
3. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-23 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
4. This application is regarding a system, method and device for creating a rights expression for association with an item for use in a system for controlling use of the item in accordance with the rights expression, including specifying rights expression information indicating a manner of use of an item, the rights expression information including at least one element, the element having a variable and corresponding value for the variable; generating a profile of the rights expression information, including removing the value for the variable from the element; and

Art Unit: 3714

generating an identification for the profile, whereby the rights expression information can be enforced on the device based on the variable and the identification for the profile.

5. The closest prior art is by Gilliam et al. (US Patent No. 7,206,765 B2). Gilliam teaches that specifying rights expression information using a computer, said rights expression information indicating a manner of use of an item of digital content, said rights expression information including at least one element, said element having a variable and corresponding value for said variable; generating a template of said rights expression information, including removing said value for said variable from said element; generating an identification for said template.

6. Gilliam fails to teach the aspect of “transmitting said identification for said template to a device adapted to situationally determine said variable and enforce said rights expression information based on said variable and said identification for said template, whereby said rights expression information can be enforced on a device based on said variable and said identification for said template”.

7. Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would not have been motivated to include these missing elements in an embodiment in Walker disclosure because: all of the above mention reference is directed toward for a cryptographically assisted commercial network system designed to facilitate buyer-driven conditional purchase offers.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
